SUMMARY

Unity Game Developer with around 2 years of professional experience in Unity3D and C# game development across Android, iOS, and WebGL. Skilled in building gameplay systems, enemy AI, multiplayer architectures, performance optimization, and modular scalable design. Proven ability to deliver production-ready games with a strong foundation in game feel and cross-functional team collaboration.

PROFESSIONAL EXPERIENCE

Unity Developer | Neela MediaTech Pvt. Ltd.

Jul 2025 – Present

- Served as a core developer for a flagship game title with 500k+ downloads, shipping critical features and updates that improved player retention and average play time.
- Developed and delivered 15+ Unity-based in-app games with a focus on performance, scalability, and 60 FPS gameplay on Android and WebGL.
- Collaborated with cross-functional teams including designers and artists to prototype and implement core game mechanics and polished UI flows.

Game Developer | Harmonia Laboriosa

Nov 2023 – Jul 2024

- Enhanced user engagement by implementing innovative design strategies and secure backend login/auth functionalities.
- Designed core gameplay loops, UI, and backend systems for a language-learning game.
- Decreased game size by 20% for web builds by optimizing texture compression and asset packaging, making page loads and startup speeds significantly faster.
- Authored comprehensive Game Design Documents (GDDs) and technical specs, coordinating creative vision across a distributed team.

PROJECTS

Frame Recorder System | Unity Engine, C#, Design Patterns

- Developed a modular frame-based replay system enabling recording and restoration of game state per frame.
- Designed a scalable architecture where components (Transform, Physics, Animation) implement a shared interface, enabling rewind, killcams, and instant replay without modifying core gameplay systems.

Hunt Monster | Unity Engine, C#, NavMesh

- Crafted level designs and survival mechanics for a 2D game incorporating melee land monsters and ranged flying enemies.
- Developed a multi-phase boss fight with minion summoning, wave progression, and randomized weapon/health drops.

Speed Surge [Itch.io] | Unity Engine, C#, Physics

- Built a responsive 3D car controller with realistic driving physics and integrated multiple AI-powered opponent cars.
- Implemented real-time leaderboards, lap systems, timers, and car selection screens for competitive gameplay.

Obstacle Kicks [Itch.io] | Unity Engine, C#

- Designed a 2-player football game with custom aim-and-force mechanics and defensive obstacle layouts for strategic gameplay.

TECHNICAL SKILLS

Languages: C#, C++, C, Java, Python, HTML/CSS, SQL, Git

Technical Skills: Game Development, Gameplay Programming, NavMesh AI, Shader Graph, Playable API, Editor Scripting, Tool Development, UI Design, Animation, Netcode for GameObjects, Photon Fusion, Optimization, Debugging

Software & Tools: Unity Engine, Godot, Blender, Autodesk Sketchbook, Adobe XD, Adobe Illustrator

ACHIEVEMENTS & PUBLICATIONS

Research Paper Presentation – ICITSM 2025 [EUDL] | EAI Proceedings

Apr 2025

- Presented and published “A Multi-Model Video Summarization Framework Integrating Feature Extraction, Embedding and Transformer-Based Learning” proposing a multi-modal framework using OpenAI Whisper, semantic embeddings, and transformers.
